## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 23-38, drawn to a process for making functionalized polyalkyleneimines, classified in class 536, subclass 55.3.
  - II. Claims 39-41, drawn to a composition comprising at least one polyalkyleneimine, classified in class 424, subclass 78.08.
  - III. Claim 42, drawn to a method for transferring nucleic acids into cells, classified in class 435, subclass 455.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product according invention II can be made by a materially different process, for example, see page 6 of the specification as filed, which states that the polyalkyleneimines used in the present invention can be obtained according to various methods known to those skilled in the art, for example, they can be synthesized chemically by polymerization of the corresponding monomer (lines 10-15).
4. Inventions II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product

Art Unit: 1635

as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product of invention II can be used in a different process, for example, invention II can be used as a soil-releasing agent (see WO 97/42285).

5. The inventions of groups I and III are drawn to patentably distinct methods, comprising different method steps, and different objectives.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
